

**FOUR-WAY RACK (#6037/6038/6039)**

Step 1: Place frames opposite each other, making sure arm adjustment holes face inward.\*

Step 2: Bolt one leg to each frame, ensuring holes for levelers face downward.

Step 3: Bolt frame together using holes in the middle of each leg.

Step 4: Insert and bolt in top connecting tube.

Step 5: Screw levelers in place and adjust according to floor.

Step 6: Insert arms into frame and adjust to desired height.

\*Optional: You may find it easier to place parts upside down for steps 1 and 2.
