

#8447 GRID PANEL SHELF UNIT

Step 1: Use connectors to connect edge of grid panels together, using three connectors per edge. This may be done with grid panels upright or on floor. Of the two vertical bars that make up grid edge, connect to inside bar.

Step 2: With three panels upright, attach top straight shelf to rear panel at desired location.

Step 3: With top shelf in place, use connectors to attach vertical bar of shelf lip to inside vertical bar of side panel. Repeat on opposite side.

Step 4: Repeat step 2 for slanted shelves, steps 2 and 3 for other straight shelf.
