

Four Way Grid Merchandiser

Assembly Instructions

1. Thread casters into base.
2. Assemble one pair of grid panels by connecting the end of one panel to the middle rod of another. Use three grid connectors at each intersection - one each near the top, middle, and bottom of the panel.
Note: Assemble grid panels with horizontal rods facing outward.
3. Set assembled panels onto base and attach using screws through gap between two end rods.
4. Repeat steps 2 and 3 for second pair of panels, and place connectors at last two intersections.
